

Redwood EV

Charging for home, work, and destination.

Redwood EV, part of Redwood Tech Group, installs and looks after electric vehicle chargers in Dubai: supply, electrical planning, installation, and maintenance.

Latest version: <https://docs.redwood-tech.com/profiles/redwood-ev/> · Updated 7 October 2026

Who we are

The work is the same idea on every site: understand the power available, install carefully, and stay available afterwards. Redwood EV supplies the EO Charging range, built in the UK, for homes and destinations. eoHUB can put up to 30 chargers online for monitoring and load management.

Redwood EV is a Tesla recommended electrician. The Tesla 32A three-phase Wall Connector, with a 7.5 metre cable, is kept in stock, and can usually be installed in less than a week.

Services

Installation

Installers and engineers carry out the work at a time that suits the site, with care for safety and as little disruption as can be managed.

Planning and engineering

One charger or a whole car park. The power available is checked, and a practical way to charge is recommended.

Maintenance and aftersales

Questions after installation, a technician when one is needed, and maintenance contracts for sites with several chargers.

Smart application analysis

A web portal on EO smart chargers, plus training so a team can see and manage how the points are used.

Where the car is parked

Homes

A charger on the driveway or in the garage. A smart charger can show energy use in its app.

Workplaces

From one bay to a whole car park, for people who drive to work.

Destinations

Hotels, universities, malls and shops, and attractions. Guests, students, shoppers, and visitors charge while they are there.

Projects

redwood-ev.com does not publish named installation projects. The products are described as compatible with Volvo XC90, Nissan LEAF, BMW i3 and i8, Tesla Model S and Model X, Mitsubishi Outlander, and Mercedes-Benz 350e and 500e.

From the first call to aftercare

- 01 **Ask**
Home charging, workplace or destination charging, or a Tesla Wall Connector. Call, WhatsApp, or email evcharging@redwood-tech.com.
 - 02 **Check the supply**
The power on the property is reviewed before a unit is recommended.
 - 03 **Install**
The charger is fitted with care for the site.
 - 04 **Stay available**
Questions, technician visits, and, where there are several chargers, a maintenance contract.
-

Why Redwood

Published partnerships and a published stock line. Nothing is added beyond them.

EO Charging

The EO range is supplied for homes and destinations, including eoHUB for up to 30 chargers.

Tesla Wall Connector

Redwood EV publishes that it is a Tesla recommended electrician and keeps the 32A three-phase connector in stock.

After the install

Maintenance is part of the practice,
not an afterthought.
